

Heavy Animal Rescue workshop

Thursday, October 1

Location:

**Lyndhurst Fire Station,
New Forest, SO43 7BQ**

PPE required:

Outdoor clothing for the demonstrations and any suitable PPE and equipment for those wishing to take part in demonstrations.

Animal rescue is a subject that many fire and rescue services have an involvement in, yet it is an area where a large degree of specialist knowledge of both animals and rescue techniques is required if incidents are to be dealt with safely. Today's workshop explores these issues.

0900 – Registration and coffee

0930 – Jim Green Animal Rescue Specialist, Hampshire FRS

Recent developments in training and establishing levels of competency.

1000 – Professor Josh Slater, Royal Veterinary College and British Equine Veterinary Association.

Advances in vet training and knowledge, Safer Horse Rescues project and Emergency Rescue Fund, PRP transportation rescue service.

1045 – Tea/coffee

1100 – The safe rescue of equines:

Anatomy

Available pulling / lifting points

The essential role of chemical restraint techniques in safer rescues (sedation and anaesthesia)

1300 – Lunch

1400 – Professor Josh Slater and Hampshire FRS

Practical scenarios encountered and options for rescue.

1600 – Final round up and questions

1630- Close
