FIRE & RESCUE SERVICE

## Fire House Safety Activity

This activity was shared with us by a local parent, Annie who spent time with her children looking at our Home Learning pages and together they created a safe way to talk about the importance of fire safety.

### Materials needed:

Box

Paint sticks

Sellotape

Foam Balls

### Method:

- 1: Visit the [Kidzone area of our website](#) for lots of fire safety messages.
- 2: Make a box into a house with openings for roof, windows and a door.
- 3: Paint the house.
- 4: Make some flames and paint them red.
- 5: Attach flames and make sure the flames can bend inwards.
- 6: Make fire balls. This can be done using screwed up paper or foam balls painted blue

### Game:

Instruct your little firefighters to put the flames out with their water balls.

Talk about how they can keep safe.
