| Inspector: [REDACTED] | Signed: | Date: 17/02/22 |

15:30hrs

Received a phone call from the [REDACTED] asking how we came to a conclusion that a waking watch was required.

I informed him that the FRA that was seen on the day of the audit highlighted issues with the EWS and cladding and that as a result HIWFRS required something to be put in place to mitigate the risk. I also informed him that the Managing Agents then made the decision to instigate a waking watch to mitigate the risk.

He informed me that he believed the FRA to be incorrect on the risks posed by the EWS and cladding. I informed him that this would need to be discussed with the managing agents.
